

Using TurningPoint 5 From Classroom Instructor Workstations

ATTENTION: If you have presentations created using a previous version of TurningPoint, you will be asked to convert them when opening them in TurningPoint 5. Do not create TurningPoint content in newer versions and attempt to open/edit them in older versions.

STEP 1: Launch Turning Point from the Local applications folder in the Start Menu

STEP 2: Click the PowerPoint Polling option.

STEP 3: Open* your existing TurningPoint presentation file by clicking **File-->Open**.

**If your presentation was created using a previous version of TurningPoint, it will prompt you to convert the presentation.*

Once converted, you will only be able to open the presentation in TurningPoint 5.

To update the copy of TurningPoint on your personal or work machine, it is a free download at <http://www.turningtechnologies.com/responsesystems/support/downloads>
