### **Tips**

We suggest reviewing the sample entry form before completing your online entry form.

Gather all of the information before you begin the on-line form.

Several of the entry form fields have limited character space available for your responses (they are all clearly marked). We suggest you prepare your narrative responses in a word processing software (like MS Word). This will allow you to utilize the spell-check feature and the character count feature. All character space limitations count blank spaces.

The on-line form contains the "save and resume later" feature.

Your entry form is not submitted until you get to the "Final Step" page and click the submit button. The process of your form being submitted may take up to a few minutes.

Remember to have the files you want to upload saved in the correct format. The entry form will only accept jpg files. If you have uploaded the incorrect file type it will not accept your entry when you take the final step of submitting your entry. You will be redirected back to correct the error.

For additional information on preparing your images for submission we suggest visiting 23Sandy Gallery's blog where Laura Russell has written a helpful three part series.
