Artist Statement about this work

My study of the geology of the Pacific Northwest inspired Rock of Ages. The fossil record, embedded in layers of rock, tell us the history of life in this region. My book is about reading this fossil record and contains images of regional plant fossils in evolutionary sequence. The cast clay rock book covers and pages painted with handmade earth pigments give the reader a sense of earthly discovery. My hope is that the reader might become curious about the changing nature of local ecosystems. The hemp bag allows the book to be carried on a journey.

TIP: Type your statement in <https://wordcounter.net> to check the character count.

Your artist statement can explain what inspired this work, what it signifies or represents, how you made it, why you made it and perhaps what it means to you. (600 character limit--includes spaces)
